

Molteni & C

45°/VETRINA — RON GILAD 2013

1—
2

A showcase designed to display and contain precious objects and books. The result is a transparent solid that invites the gaze to linger on its contents. The shelves are rotated and bevelled, creating a displacement from a 90° angle to 45° without edges. Geometrically rotating surfaces that create 45° smoothed edges achieved by using a metal joint onto which aluminum profiles are hooked, veneered with precious wood types. The opening is totally invisible with the exception of a small key on the lateral profile.

FEATURES

Showcase made of wood veneered aluminium profiles. The door is always equipped with lock and always opens to the right (DX).
