HALF A SQUARE — MICHAEL ANASTASSIADES 2020

1—
3

The project is distinctly minimalist in design but rich in his choice of materials, such as aluminium, marble, reflecting glass and eucalyptus or oak. The frame, made of brushed aluminium and painted pewter colour and green, is assembled by means of the strong pressure die cast legs. The joint between the parts determines a decorative triangular-shape finished in brass which enhances the solidity of the frame and characterizes the elegance of the design. The table tops are made of marble, grafene reflecting glass and eucalyptus or oak. They come in different sizes, rectangular and square. A design where Anastassiades' engineering training almost prevailed over his skills as a designer to offer us a unique and intriguing object.
