7070 — RODOLFO DORDONI 2022

1—
3

7070 is a fascinating nighttime system to provide the area traditionally devoted to rest and relaxation with a new series of nighttime complements, modernly designed to meet the needs of contemporary living. Rodolfo Dordoni has designed a complete set, where fine materials and finishes combine with a sober and elegant design for new functional aesthetic solutions. Both units, night tables and drawer units feature a front with rounded corners, which lightens the structure. The drawers in the drawer units and in the night tables are lacquered in the colours of the Molteni&C range and are fitted with fine, recessed and easy-to-grip pewter handles. One novel feature is the superimposed tray-cum-drawer, again made of eucalyptus wood, complete with a transparent ribbed glass top. As an alternative, the night table and the drawer unit can be enriched with a eucalyptus, matt lacquers colours or marble top.
