DIAMOND — PATRICIA URQUIOLA 2004

1—
3

A range of tables with folded legs like a delicate origami. An element skillfully assembled by a light folded aluminum foil and an internal part composed by aluminum and polyurethane inserts to give stability. The square or rectangular tops are available in glass, the support structure is either shiny aluminum or glossy lacquered. Diamond won the Red dot design award Best of the best in 2005.

Ongoing research and experimentation with innovative and characterful materials, to integrate products already in the collection with this year's new additions, leads to expanding the versions of Patricia Urquiola's Diamond, now also with the frame in the new copper finish and marble tops, such as the news Sahara noir, orient grey and calacatta gold.
