TECHNICAL INFORMATION

STRUCTURE  
Extruded aluminium painted in colours from the Molteni range.

ECOTONE™ TOP  
Slabs produced using recycled components with some veins highly visible and others less obvious, but always through-body that preserve the characteristics of performance and durability with the added extra of a more eco-friendly formula.

ECOTONE™ A constant commitment to research and innovation

The new generation of slabs with recycled components   
Ecological, a resin derived from bio compounds   
A silica content of less than 5%   
A production process that uses largely energy from renewable sources, such as wind, solar and biomass   
The almost total recycling of water sed by the plants 

ECOTONE™ Features

- |                                                                                                                                             |                                                                                                                                                                   |
|---------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <b>Waterproof</b><br>does not absorb liquids            |  <b>Acid resistant</b><br>resists external aggressions                         |
|  <b>Fireproof</b><br>is heat resistant and non-flammable |  <b>Shock resistant</b><br>withstands impacts well                             |
|  <b>Anti-scratch</b><br>is difficult to scratch          |  <b>Stain resistant</b><br>resists stains from many products and is non-porous |
