## HONEY — ARIK LEVY 2009

1—  
4

A simple but elegant bed characterized by its upholstery in fabric or leather, its materials and its tailoring, typical of the most refined “couturiers”. Honey is a fabric bed with a modern line, a bed of limited size, designed to fit into various sleeping environments. The container below the mattress opens with a swing mechanism developed to ease access to the compartment. The front opens to allow access to a horizontal lift for comfortable bed making.
